MEMORANDUM FOR:	Information Systems Board Members	
FROM:	Executive Secretary to the Board	25X1
<b>y</b>	Executive Secretary to the Board	
SUBJECT:	Minutes of 27 April 1984 Meeting of the Information Systems Board	
		•
1. The Inf	formation Systems Board met on Friday.	
27 April 1984.		25X1
		25 <b>X</b> 1
2.	asked for approval of the revised minutes of	25 <b>X</b> 1
	eting which incorporated a change suggested by here were no further additions or corrections.	25 <b>X</b> 1
11	nere were no further additions or corrections.	23/1
3.	briefly summarized the status of the persons	a 125X1
computer require		25X1
	will do	25 <b>X</b> 1
the work.		25 <b>X</b> 1
	C/IIIC/O/Compt. and	25X1
Chairman of the	request, C/IHG/O/Compt and Information Services Planning Working Group)	
	analysis and four recommendations contained in the	
	"Report on Agency Information Services Planning."	A.s
	he need for information services planning,	25X1
	ent Comptroller's meeting in which several information	
	tives for FY 1986 were perceived as redundant.	
		25X1
	So large a	
proportion, he s	suggested, should warrant better advance planning and Because such planning was not done, the Comptroller	<b>a</b>
prioritization.	because such prainting was not done, the compercite	T.
•		

suggested the recommendation be rewritten to make the Executive Director "senior Agency coordinator of planning."	25 <b>X</b> 1
9. The Board similarly agreed on the second and third recommendations after some discussion and clarification.  asked for opinions on the future of the Information Systems Board, reminding members that much time is spent on Board meetings and the Working Groups' efforts. He also commented that he had heard more favorable than critical comments about the Board's role to date. He noted that the Headquarters Notice establishing the Board had expire	
remarked that the status of the Board and whe it met were entirely up to the Executive Director.	<u>n</u> 25X1 25X1
agreed that the Board was a useful forum for	25X1
exchanging information and coordinating positions. aske what function the Board should serve regarding the question of	d25X1
information systems planning. suggested that, most	25X1
immediately, the Board should review and comment upon the long-range	23/1
plans prepared by the Directorates.   concluded the	25 <b>X</b> 1
discussion by remarking that the Information Systems Board would be	
continued until further notice but that he saw no need for another Headquarters notice to that effect. The Board expressed satisfaction	n
with this decision.	25X1
noting that the requirement for a directorate plan was interesting since, in practice, the offices would have to do the planning.	25X1
commented that the directorate plan may well consist of number of office plans, but that the directorates are the ultimate organization responsible for providing central services and that office plans should be coordinated with each directorate just as directorate plans should be coordinated to produce an Agency-wide	€25X1
plan. mentioned that the DS&T already has a long-range information handling plan underway, and most other Board members	25X1
agreed that their Directorates were prepared to draw up such a plan.	25X1
next asked the Board to discuss the Working	25 <b>X</b> 1
Group's fourth recommendation:	•
to establish a small three to five person staff, reportion to the Executive Director, to develop a planning methodology, integrate the directorate plans into an Agency-wide plan, and evaluate information systems performance against the long-range plan.	
planning, reminding the Board that the Information Systems Architects study had recommended a large staff to handle such issues. He noted that his small Planning Staff was formed to advise him on the whole array of complex technical issues confronting the Agency including information handling and that he was not inclined to increase the size of that Staff despite the recognized need for a single point of	d ng e

## Approved For Release 2008/09/04 : CIA-RDP86M00886R000600060010-2

coordination, both within the Directorates and at the Agency level.
He stated that he needed to study the options available since
information systems planning is a serious management problem which
obviously is not going away. He rhetorically asked if the Executive
Committee should revisit the idea of a fifth directorate
particularly in the telecommunications context. 25X1
Carta Abada minan Dinastanat25V1
felt that given Directorat25X1
plans no staff would be needed since any inconsistancies or
conflicts probably could be dealt with on an ad hoc basis before each
budget submission is made. disagreed, suggesting that the 25X1
resolution of differences is not an easy job when offices and
directorates are competing for scarce resources. 25X1
complimented the Working Group in laying out all the options but
suggested that the crucial point in good planning was not who wrote
the plan but that the planning process be synchronized with the budget cycle. also opposed a full-time 25X1
planning staff handling the planning function. 25X1 suggested that, since technology is changing so rapidly, the Agency
should adopt a planning mechanism that is more flexible staffs have
a tendancy to perpetuate themselves and become moribund, he noted.
supported the concept of centralized Agency planning accomplished
within a fifth directorate. agreed that planning had \$25X1
be syncronized with the budget cycle and, for that reason, supported
placing the function in the Comptroller's office. 25X1.
